## Profile

I have 4 basic objectives. I want to be a creative individual. I want to continue to expand upon my skill set and always work towards taking myself to the next level. I want to prove myself. I must continue to learn new things.

## A very brief professional history

Web development is pretty much the perfect career for me. I love that I can be visually creative while designing websites and elements and at the same time I can exercise my logical side when I write the code that drives the website and its various functions.

Since starting at Brookside Studios as a web developer, my learning curve has been nearly vertical for over 4 years now and I am a much, much more knowledgeable and well-rounded developer. I code mainly in PHP, including CakePHP (framework) along with other tools like LESS for CSS and jQuery with Javascript. My experience as a server admin at Times Record helped me to understand various server environments and limitations that I encounter with web development.

## Skills

- Web Design/Development: HTML, CSS/LESS, PHP, MySQL, Javascript, CakePHP, jQuery, Twitter Bootstrap and related grid systems.
- Adobe Creative Suite
- Macintosh OS X – Experience as a server admin and desktop support
- Software Development – Mac only, using Applescript, ApplescriptObjC, and Cocoa.

## Qualities

- I am an Eagle Scout. I was also a scout master for a couple of years before moving.
- I do not like to be disorganized. It hurts efficiency.
- I take pride in my work and strive for quality, always.
- I am open to new methods and tech that improve my workflow and quality of work.
- I am always trying to learn something new.
- I am very much a family man. I take pride in being a father to my two boys and a good husband to my wife of nearly a decade.
- I am an active member of my church.

## Recognition

I was awarded 10 times from '07-'10 for my graphic work at the Times Record

- 2007: 3 awards
- 2008: 5 awards
- 2010: 2 awards

## Experience

### **Web Developer, Brookside Studios** Tulsa, OK • Employed Jan 2010-Current

- Develop cutting-edge websites that exceed our clients expectations using technologies such as PHP, Javascript, jQuery, CakePHP frameworks, CSS3, LESS, MySQL, and HTML5.
- Troubleshoot design and programming issues.
- Deploy websites to work in a number of current and past web browsers to ensure a consistent look and feel, and more importantly, functionality regardless of the web browser.

### **System Administrator, Times Record** Fort Smith, AR • Oct 2002-Jan 2010

- Upkeep and functionality of approx. 150 Macintosh computers.
- Continuing functionality and efficiency of 5 xServe servers and several other servers.
- Software support to all employees who use any of our computers.
- Troubleshooting and problem-solving any issues which arise that relate to our computers and servers.
- Software development: Using Applescript Studio, I have created many small utilities that assist us in file transfer, backup, creation, or other small automation tasks. I have created 2 commercial-grade applications that have been made available.
- Graphic Designer: Special section covers, magazine covers, many other misc. design projects.
- Go-to Guy: I also served as the back-up for many other employee's due to the extensive knowledge of our system that I gained while progressing through the ranks.

### **Webmaster, Christian Online** Van Buren, AR • July 2002-Oct 2002

- Design and development of the website. I utilized HTML, CSS, and PHP for this.
- Design of logo, business cards, and printed flyers.

### **Freelancer, Home** 1999-Current

- Web Development
- Graphic Design
- Software Development
- IT Help for OS X, OS X Server, Mac computers, Windows products.

#### Education

**Greenwood High School** — High School Diploma, 2002

**University of Arkansas, FS**— Graphic Design (non-grad), 2002

- Logo design, Advertising Design, Typography, Digital Design, Color, Drawing, Digital Illustration, 2D Design, Identity Design
